Susquehanna

In 1966 EMD introduced a new line of locomotives based on the 16-cylinder 645-series prime mover. The "40-series" included a six-axle and four-axle model, the latter being the GP40. A total of 1,145 units were produced between 1966 and 1972. These turbocharged 3,000hp locomotives were used primarily in road freight service. The GP40 was a versatile locomotive that could be found across the US hauling drag freights over mountain passes and leading high-speed intermodal trains across flat terrain. Three rooftop radiator fans at the rear of the long hood differentiate a GP40 from its lower horsepower counterpart, the GP38, which has two fans at this location. Many GP40s are still in service today.

### Features:

- Golden-white LEDs
- Realistic die-cast underframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers
- Detailed cab interior with crew
- Separately-installed scale windshield wipers, metal grab irons and fine scale handrails
- Movable drop steps
- Walkway safety tread
- Coupler cut bars
- Multiple unit hoses and trainline hoses
- Snowplow

### Additional feature parts included but not installed (GP-40):

Electrical cabinet air filter box (ECAFB)

Two engine compartment roof vents which were added by many railroads sometime after delivery

AccuMate® couplers are made under license from AccuRail, Inc.
