2022

We're excited to start 2022 with the arrival of our HO scale Siemens ALC-42 Charger, decorated in the Amtrak® Phase VI scheme (pictured on the front cover) and as a limited edition model in the one-off "Day 1" heritage scheme. This model has been developed with Siemens alongside the real locomotives, which will be entering service on long-distance trains as the year progresses. We're also taking this opportunity to announce our addition of the VIA Rail Canada™ SC-42 Charger to the line. Both models feature the same function-packed TCS WOWsound® system found on our SC-44 Charger, which includes CD-quality audio and a Keep Alive® device to ensure smooth operation.

Also on the cover, we're pleased to introduce our new Concrete Tie *E-Z Track*® - the perfect solution for modeling modern, high-speed mainlines, be it the Northeast Corridor or the BNSF Transcon over Cajon Pass. Featuring both 18" and 22" Radius Curves, a 9" Straight Terminal Rerailer with modern grade crossing texture, #4 Turnouts, and a Hayes Bumper, this range sets the stage for fast mainline action.

Our new *Amtrak*® *City Sprinter* HO scale train set features the popular ACS-64 electric. With three lighted Amfleet® cars and a wide oval of new 22" radius Concrete Tie *E-Z Track*®, you can recreate the thrill of high-speed passenger railroading in miniature. For modelers who favor steam, our *Daylight Special* is ready for service. Featuring a powerful Southern Pacific™ GS-4 locomotive and three Smooth-Side lighted cars, this set will transport you to the era of streamlined transportation. With classic Boy Scouts of America® artwork, our *BSA*® *All American* is the perfect gift for any budding scout, and our *Norman Rockwell Christmas Express* is sure to inspire holiday joy, adorned with iconic Norman Rockwell works and led by a festive 0-6-0 locomotive.

In N scale, we're introducing two locomotives which both, in their time, have been emblematic of advanced passenger railroading technology; the PRR Streamlined K4, and the Siemens SC-44 Charger. The K4 features a die-cast metal boiler for an authentic scale weight and feel, and comes equipped with directional lighting and Soundtraxx™ Sound Value DCC. Our N scale SC-44 Charger includes TCS WOWsound® and a Keep Alive® device for smooth, continuous operation. Also arriving in N scale; our *Keystone* set is the perfect introduction to model railroading, with a Prairie steam locomotive and freight consist featuring a variety of authentic paint schemes.

In On30, we've added a great selection of rolling stock items to expand your collection. From new "Gondola Style" excursion cars, painted for real-world narrow gauge railroads, to 2-bay hoppers and wood-side cabooses, these highly detailed *Spectrum*® items will be a welcome addition to any On30 layout.

In Large Scale, we're continuing to expand our range of 1:29 scale models. This year will see the introduction of our 53' Evans Boxcar featuring a flashing LED "End of Train" device. These will look excellent alongside our upcoming Dash 9 and will provide an authentic "last car" for modern freight consists.

Lastly, Williams by Bachmann welcomes new additions to the growing *E-Z Street*® range of road vehicles with a series of new delivery vans, and is shipping the latest Quad Hoppers and Eggliners.

While we've highlighted many exciting additions here, we've got a whole lot more packed in this catalog. Be sure to look out for new paint schemes and road number announcements for a wide range of locomotives, rolling stock items, and much more. As always, Bachmann offers plenty of options for beginners, advanced modelers, and everyone in between in 2022.
