The 20,700 gallon tank car was introduced in the mid-sixties by General American Transportation Corporation, more commonly known simply as GATX. The design is a general-purpose, non-insulated, non-pressure tank car. This Atlas HO scale Master Level model recreates two major saddle variations (Type 10 and Type 20) and two top platform variations (one- and two-piece). The more common products carried in this tank car were tallow, animal fat, fuel oil, diesel fuel, vegetable oil, soybean oil, fertilizers, lubricating oil, waste oil, and glycol.

Features:

- Detailed five section non-insulated body
- Two saddle variations (Type 10 or 20)
- Detailed top platform with two options (one- or two-piece)
- Bottom outlet, Safety vent, See-through end walks
- Detailed brake gear and pipes
- With A-end pipe stubs (where applicable)
- Correct lettering to prototype cars

In 1972, Berwick Forge & Fabricating, of Berwick, Pennsylvania began producing modern 50' sliding door box cars which featured their new corrugated non-terminating "sine-wave" ends. Initially sold to over 35 railroads across the nation, these box cars were an unfortunate casualty of the economic recession of the late 1970's and Berwick was forced to stop production in 1982. However, Berwick's 50' hauler found a place in railroad history through a strong second hand market that continues even today.

Features:

- Ready-to-run
- Full under body detail with brake rigging
- Overhanging X-panel roof
- Non-terminating sine wave ends
- Separately applied wire grabs
- Detailed end ladders and brake gear
- Accurate painting and printing
- Blackened metal wheels
- AccuMate® couplers

Starting in the mid 1950's the AAR design was adapted to create a plug door, insulated boxcar. These cars could be used to carry food products or other perishable commodities where temperature control was important but where refrigeration was not required. Typically these cars had 8/8 panel riveted sides, a roughly eight foot door opening (there were some variations of an inch or two) straight side sills and overhanging diagonal panel roofs. These cars were built for roads nationwide and painted in fairly colorful paint schemes.

Features:

- Highly detailed, ready-to-run model with accurate painting and printing
- Late improved Dreadnaught ends
- Overhanging diagonal panel roof with or without roofwalk as per the prototype
- Straight-side sill body design
- 8/8 panel, riveted sides
- Highly detailed underframe
- Separately-applied ladders, grab irons and latch bars
- Blackened metal wheels
- AccuMate® couplers

AccuMate® couplers are made under license from AccuRail, Inc.
