TOTAL PIECES ORDERED					

The 3500 Cubic Foot Dry-Flo Covered Hopper was a commodity hauling backbone for over 40 years. In 1959, General American started producing Dry-Flo covered hoppers in response to customer demands for larger hoppers capable of handling bulk commodities. Covered hopper innovations during the 1950s proved valuable to shippers; they wanted covered hoppers that could handle larger quantities of specialized commodities such as oats and malt. These models were designed to match the prototype - down to the last detail! Engineered from prototype blueprints, the N Scale Dry-Flo will feature an accurate attention to both body and paint detail as you've come to expect from Atlas!

Features:

- Ready-To-Run
- Injection-Molded Plastic
- Fine-Scale Detail
- Separate Brake Detail
- Chemically Etched Brake Platform
- Accurately Painted/Printed
- Prototypical Ride Height
- 70-Ton ASF Ride Control Trucks
- 33" Metal Wheels
- Body Mounted Scale Coupler
