

## N Scale UNION PACIFIC BIG BOY STEAM LOCOMOTIVE #4014

*Pre-production sample shown, some details and colors are not final*

**Announced: 12/1/2022**

Analog Unit Order Deadline: 1/28/2023

DCC, DCC & Sound Unit Order Deadline: 12/28/2022

**Planned Release Dates:**

Analog Units: **May 2023**

DCC, DCC & Sound Units: **July 2023**

At long last – the **Ultimate Steam Locomotive** announcement from Kato USA! Joining the ranks of the Southern Pacific GS-4 and Union Pacific FEF-3, the latest and possibly most notable Steam locomotive ever built, the **Union Pacific Big Boy Steam Locomotive** will be produced by Kato in N scale for release in Mid-Late 2023!

This locomotive will be available in standard Analog (DC), as well as with factory installed DCC and **Soundtraxx DCC + Sound!**

*Pre-production sample, some details and colors are not final*

**Locomotive Features:**

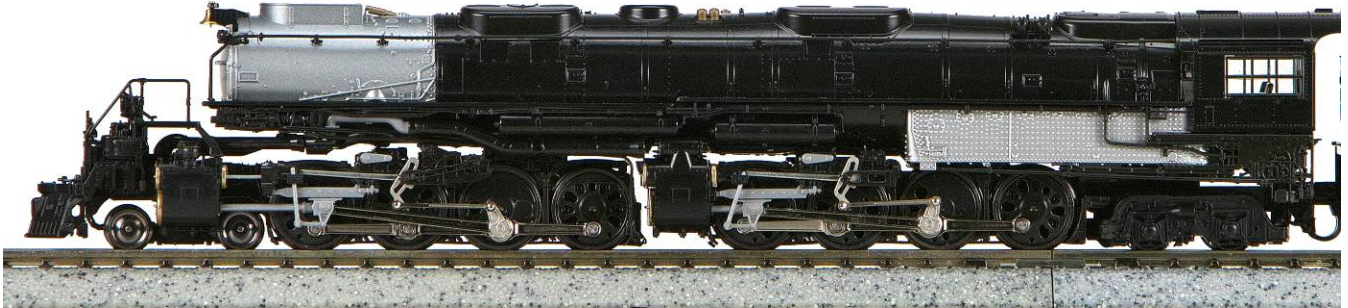

- Capable of navigating 11” (282mm) radius curves thanks to its articulated frame.
- An all-new synchronized twin-motor coreless drive that provides the combined power of two individual engines!
- Illuminated deck-mounted headlight.
- Post 2021 “modern” excursion appearance!
- Exquisitely molded details replicating the distinct and extensive piping details that stretch the length of the boiler.
- Heavily weighted with its metal frame and additional weights in the body details for precise balance and unparalleled pulling capacity.
- Both body and tender electrical pickup for unmatched electrical reliability.

## N Scale UNION PACIFIC BIG BOY STEAM LOCOMOTIVE #4014

*Thanks to a special articulated mechanism, the Big Boy is able to maneuver around 11" radius curves, just like the Union Pacific FEF-3 and GS-4 from Kato USA!*

*Pre-production sample, some details and colors are not final*
