*Different road number shown for reference purposes

The future is now for Amtrak and it's coming to Kato USA! After a successful release of our N Scale ALC-42 in both Phase VI and "Day One" paint schemes, we are excited to announce the newest Amtrak livery, Phase VII, is coming to our version of the model for Fall 2023 delivery. This model will feature all the same specifications as our previous release including front and rear LED lighting, prototypical see-through side vents, and our smooth running 5-pole motor for unmatched pulling power and dependability.

This release will include road numbers 312, 314, and 315 with each available for pre-order in DC/analog, DCC only, and DCC w/Sound. The future will be here before you know so be sure to place your pre-orders for this model by Friday April, 28th and reserve your copy of Amtrak's latest locomotive!

- Pre-Order Deadline: Friday April 28th by 5pm CST-
