

Baltimore & Ohio[®] Road Number 631542

Built in September of 1957, this PS-2 hopper with Bettendorf trucks was purchased by Baltimore & Ohio in an order of 600 cars. The Pullman-Standard all-welded steel, 2,003 cubic-foot two bay covered hopper would become one of the most popular cars of its type with railroads and private industry. It was designed to haul everything from powdered chemicals, to grains, to construction materials such as sand or cement.

#095 00 042...\$45.95

Denver & Rio Grande Western[®] Road Number 21001

This 50' flat car with Bettendorf trucks was built in the late 1950s for the D&RGW. It was used for general service, and serviced in the early 1960s. D&RGW was formed in 1870 and operated the highest mainline railroad in the United States through the Colorado Rockies at an altitude of 10,240 feet.

#105 00 462...\$29.95

Great Northern Road Number 295601

Built in March 1913 for Great Northern Railway, this 39 foot, ICC-103, 10,000-gallon tank car with Archbar trucks belonged to a series of 25 cars. Great Northern was a Class 1 railroad founded in 1881 and eventually was merged with Northern Pacific, and others, to form Burlington Northern Railroad in 1970.

#065 00 306...\$28.95

War of the Worlds #3 with Artillery Load USA 2465

Newly developed weapons of war are quickly put into action against the Martians. The classic science fiction novel *War of the Worlds*, first published by H.G. Wells in 1898, chronicles an Earth invasion by Martians, and humanity's attempt to retake the planet. This novel-inspired freight car is decorated in a patriotic billboard scheme, featuring drawings from the 1906 edition, illustrated by Henrique Alvim Corrêa.

Multi-media kit.
Includes unassembled, undecorated pieces.

#139 00 031...\$28.95

Norfolk Southern/ex-ACY Road Number 517835 MW

This 50' boxcar with Barber Roller Bearing trucks was lettered for the Akron, Canton & Youngstown, which was a Class 1 railroad that operated between Mogadore and Akron, Ohio from 1907 until 1982. In 1964, the Norfolk & Western Railway acquired operating control of the AC&Y and it was fully merged into the N&W in 1982.

Wabash Cannonball 5-Pack
Road Numbers 179, City of Lafayette, 1402, 1568, 362

The Wabash Cannonball was a 1930's folk song written about a fictional train ride through the scenery of America. The song became so popular that the Wabash Railroad renamed their daytime express train between Detroit and St. Louis "the Wabash Cannonball" in response. It ran from 1950 until the early 1970s upon the creation of Amtrak. These heavyweight passenger cars feature 6-Wheel Passenger trucks.

Pennsylvania Railroad 3-Pack with Sherman Tank Load
Road Numbers 470104, 470117, 470132

Built in 1929, this 70-ton class F30 flat car with Bettendorf trucks was used in general service for the Pennsylvania Railroad. Pennsylvania was a large Class 1 railroad formed in 1846 and grew to be a predominant shipper on the east coast until 1968 when it merged with rival New York Central to form Penn Central.

The M4A3 Sherman tank was a game changer for Allied Forces during WW2. There were a number of basic variations and modifications, both from the factory and in the field, in an attempt to meet the growing power of Axis tanks and artillery. They were built in factories all over the US and in Canada and once war production started in earnest, using common designs and components put production into overdrive. Finished tanks were shipped via rail to strategic outposts and ports across North America. Almost every railroad had a hand in transporting strategic loads across the country, the Sherman being one of them.

United States Department of the Interior - Bureau of Mines

The U.S. Bureau of Mines was created in 1910 by Congress to reduce the number of deaths from mining accidents. From the 1910s until the early 1930s, several cars were employed as rolling safety training classrooms, often seen in the West Virginia region. These government Bureau of Mines cars were visible indicators of Progressive Era humanitarian and national reform programs.

Grain Storage Hopper Kit

Surplus freight cars often live on, avoiding the scrapper. Across the country, flat cars are used as bridges, boxcars as storage containers, and covered hoppers for storage of feed and grain. Generally these are elevated so that trucks can drive below and be loaded for deliveries on the farm or elsewhere. Our model represents one such example, an old weather-beaten hopper placed on concrete bases and fed by small vertical conveyors.

Multi-media kit includes unassembled, undecorated pieces with pre-weathered car body.

TTPX 3-Pack with Cable Reel Load

Accepting Pre-Orders Through May 31st

Cable reels, a common commodity, come in all sizes and weights and present railroads with an interesting lading problem. Many of the solutions involved heavy wood timbers to brace loads that were prone to shifting but they added extra weight and complexity to load outs. Nowadays purpose built metal frame work is employed to streamline the loading operation and cut down on needless weight.

Union Pacific[®] Road Number 1426/1449

These powered F7 units are some of the most recognizable locomotives. Painted yellow with aluminum stripe and red lettering, these were introduced in 1951 and joined a large F3 fleet. Truly a transition locomotive—the F7 only lasted for ten to eleven years before they were traded in for GP30's, GP35's and DD35's.
