All Road Names

PROTOTYPE HISTORY:

It was the mid 1970s, and the incentive per diem box car boom was just beginning. New, brightly painted box cars seemed to appear overnight. Many were lettered for various short lines. FMC (Food Machinery Corporation) was a significant builder of many of these cars. The 50' outside post, non-terminating end box car, became the foundation for new per diem cars built in the 1970s. The 50' FMC cars also varied in door configuration and style to better suit each customer. These models can still be seen today in the modern railroading scene.

MODEL FEATURES:

- Scale profile brake wheel
- Fully-assembled and ready-to-run out of the box
- Highly detailed, injection molded body
- Screw mounted trucks
- Weighted for trouble free operation
- Operates on Code 55 and 80 rail
- Roller bearing trucks
- Accurately painted and printed
- Machined metal wheels
- McHenry knuckle couplers
- Clear plastic jewel box for convenient storage
- Minimum radius: 9 3/4"

PRIMED FOR GRIME MODELS FEATURE
