## PRE-ORDER ANNOUNCEMENTS - JANUARY 2024

**GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY MARCH 13<sup>TH</sup> 2024**

January 2023

Dear Model Railroader,

Atlas is celebrating the momentous occasion of our 100th Anniversary throughout 2024! Our year-long anniversary announcements begin with The Atlas 100th Anniversary Catalog, Volume 1. This edition of the All Scales Monthly Catalog (ASMC) is chock full of new announcements in N & HO scales. Stay tuned throughout the year for additional catalogs featuring all Atlas' offered scales!

The ASMC is the basis of the distinctive Atlas Guaranteed Pre-Order system. Before the Research & Development department gives the final go ahead for production, Atlas announces to its customers the products we are preparing to make. This announcement comes in the form of the ASMC that provides our customers with the opportunity to arrange a guaranteed pre-order if placed by the given deadline. If possible, Atlas will try to fill orders placed after the given "due date", but these can not be guaranteed.

The Atlas 100th Anniversary Catalog, Volume 1 edition includes announcements of prototypical N and HO locomotives including the SD-35 and the RS-11. We're also announcing plenty of prototype accurate rolling stock including N & HO scale 42' Coil Steel Cars and 40' Standard Height Containers. In HO, the highly sought after Thrall 2743 Gondolas and 2-Bay Offset Hoppers return to the lineup! Don't miss new paint schemes and road numbers offered in N scale on the PS-4427 Hoppers and Trainman 42' Gondolas.

While on the Atlas website, [shop.atlasrr.com](http://shop.atlasrr.com), be sure to peruse the "New Arrivals" pages to see what has recently arrived on Authorized Dealer shelves, or the In-Stock pages to see what is readily available from Atlas. Recently arrived and now available is Atlas' tried and true N scale True-Track, now with realistic gray roadbed! Take a look at the new roadbed color in the photos on the back cover of this catalog.

Need to do some track work? Atlas has all the pieces you need - from straights to switches and everything in between! Atlas can also help outfit you with a full layout package - check out page 24-25 for more information. We also offer a full line of instructional guides if you're looking to start fresh with a brand new layout! For a complete listing of our books, visit our website or inquire at your local hobby shop. For assistance finding an Atlas Authorized Dealer near you, use our handy Dealer locator at <https://shop.atlasrr.com/storelocator.aspx>.

Don't miss out on all of the latest Atlas news, announcements, special offers and more. You can ensure that you receive the latest Atlas news delivered to your inbox by visiting [shop.atlasrr.com](http://shop.atlasrr.com) and signing up for our email newsletter - *the Atlas Insider*.

Thank you for your interest and enthusiasm in the exceptional multi-scale product offerings produced by Atlas Model Railroad Company.

Happy Modeling,

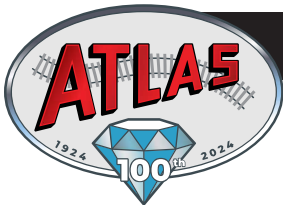

Drew Postle  
Atlas Sales Manager

## **100 YEARS OF ATLAS HISTORY**

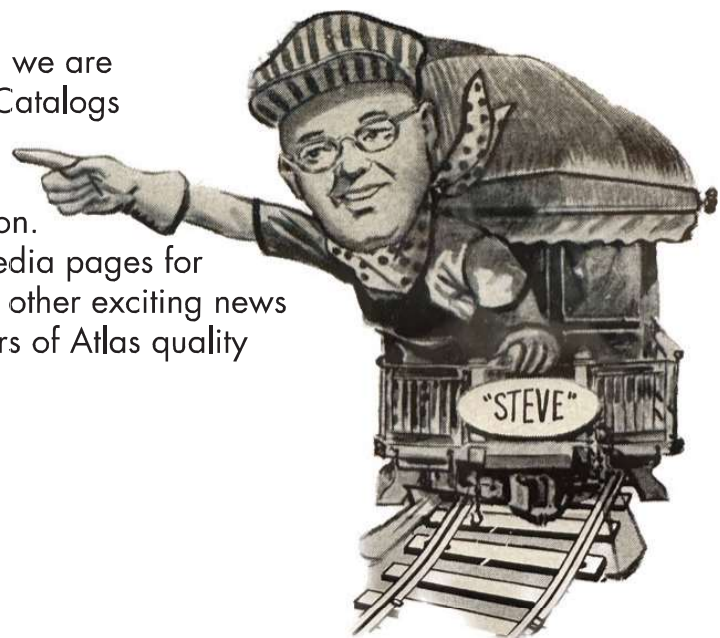

Atlas Tool Company was founded by Stephan Schaffan Sr. in 1924 as a general machine shop in a small garage at 330 Waverly Avenue in Newark, New Jersey. His son, Stephan Schaffan Jr. joined him in the business in 1933. As a frequent visitor to the local hobby shop, he would often ask the owner if there was anything he could do to earn some extra spending money. Tired of listening to his requests, the hobby-store owner threw some model railroad track parts his way and said, "Here, see if you can improve on this".

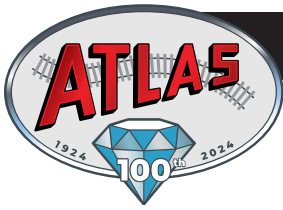

In those days, railroad modelers had to assemble and build everything from scratch. Steve Jr. created a "switch kit" which sold so well, that the entire family worked on them in the basement at night, while doing business as usual in the machine shop during the day.

Not long after, Steve Jr.'s accomplishments include engineering the stapling of rail to fiber track, inventing the first practical rail joiner and pre-assembled turnouts and flexible track—all of which helped to popularize model railroading and assisted in the creation of a mass-market hobby. As the business grew, their manufacturing needs went beyond what the small garage could provide, so in 1947 Steve and his father had the first factory built in Hillside, New Jersey at 413 Florence Avenue. On September 30th, 1949, Atlas Tool Company Inc. was officially incorporated as a New Jersey company.

Over time Atlas, has expanded their product line to include much more than just track. At your local hobby store you can pick up Atlas track, locomotives, freight cars, signals, lighting and more in HO, N, O and even Z scale.

To mark the 100th anniversary of Atlas, we are publishing special edition Anniversary Catalogs throughout 2024. This catalog, featuring HO & N scale products is Volume 1 of our Anniversary Collection. Stay tuned to our website and social media pages for future Anniversary Catalog releases and other exciting news that we have planned to mark 100 years of Atlas quality and innovation!

# PRE-ORDER ANNOUNCEMENTS - JANUARY 2024

**GUARANTEED PRE-ORDER DUE DATE: WEDNESDAY MARCH 13<sup>TH</sup> 2024**

## ATLAS 100 YEAR ANNIVERSARY ENGINE

We recently announced ALP-45DP locomotives and Bombardier passenger car models decorated in special 100th anniversary paint schemes that celebrate our long history. What makes it even more memorable is that residents and visitors in the New Jersey area can now see an actual locomotive wearing the Atlas 100 anniversary scheme thanks to our partnership with NJ TRANSIT. NJ TRANSIT #4503 has been wrapped with our commemorative 100 anniversary artwork, and is now in service on select NJ Transit routes.

Note: The guaranteed pre-order period for these models has closed. However, we will continue to accept orders and will fulfill as many as possible but these can not be guaranteed.

**To celebrate the release of NJ TRANSIT #4503 in Atlas' 100th Anniversary paint scheme, a contest was held for eagle eyed railfans who spotted the locomotive on the rails! We received so many fantastic photo submissions that it was hard to choose the best. The 1st, 2nd and 3rd place winners are shown below!**

**See these photos and more on our social media pages and website, [shop.atlasrr.com](http://shop.atlasrr.com)**

Present on the rails from the steam era and transitioning for use through the early diesel era, gondolas carried many different types of loads, from wood chips to scrap metal to containers for goods such as cement. Atlas' model features removable cement loads and will fit layouts from the 1940s through the 1960s.

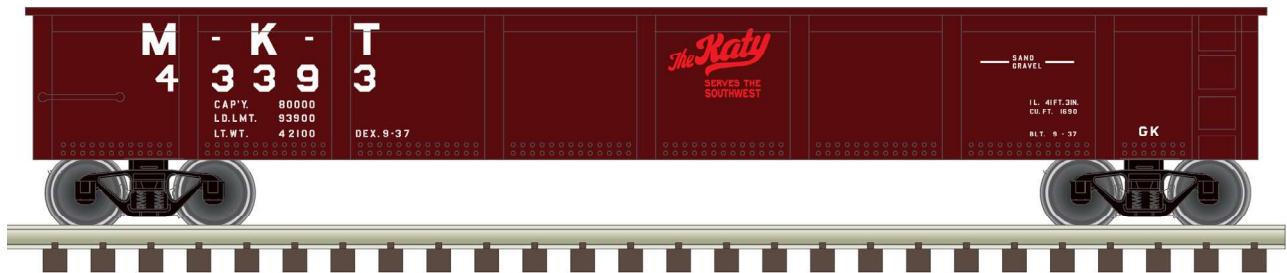

**Features:**

- Colorful painting and printing
- Detailed underframe
- Removable cement container load
- Ready-to-run
- Rivet detail
- AccuMate® couplers

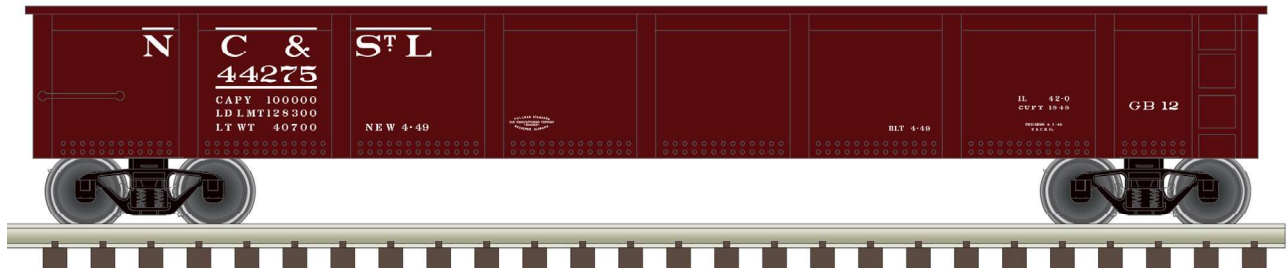

AccuMate® couplers are made under license from AccuRail, Inc.

Previous run model shown with removable cement container load also included on this run.

## Atlas Track Planning Software

Atlas is proud to offer Atlas Track Planning Software to help you design your dream layout. This software allows you to create & customize a layout, view it as a 3D model and then generate a shopping list to make your dream layout a reality.

Note - this software works on Windows OS only.

### Features:

- Choose from a wide variety of Atlas track lines and create your dream layout.
- Model flex-track routes in an easy, intuitive and realistic way
- Arrange your layout on multiple levels with different heights and grades
- Easily draw figures to create train stations, houses, industries, roads & infrastructure
- Use the 3D tool to bring your layout to life
- Measure distances and track section lengths
- Export, Print or Share your layout with your friends
- View and print a list of the Atlas track pieces you need to begin building your layout
- Layout libraries will be available with future library updates

# Your Model Train Empire?

ried and true layout track plans in N & HO scale.  
accessories to build the layout of your choice.

**No Matter the Scale, No Matter the Space - Atlas Has the Layout For You!**

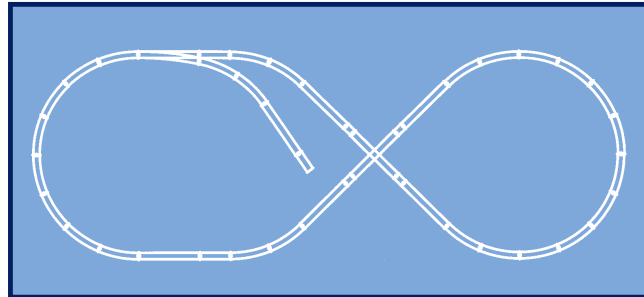

## **N CODE 80: N-7 TWICE AROUND VIA "UP & OVER"**

**From Book #6:** *Introduction to N Scale Model Railroading*

**Minimum Table Size Required:** 32" x 45"

**Products Required:** Straight sections, radius sections, turnouts, a crossing, bumpers, insulated joiners and terminal joiners, necessary electrical components

If you enjoy watching a long train work its way up and down the grades of a long winding main line, the N7 is the layout for you. On this layout, yard tracks are available for breaking up and storing long trains, and a passing track with two industry spurs is available to provide additional operating diversions.

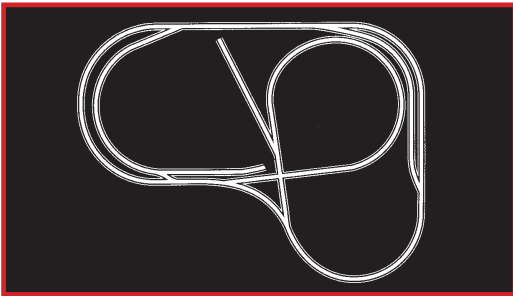

## **N SCALE CODE 55: N-504 PLATTSBURG PRETZEL**

**From web site:** [shop.atlasrr.com](http://shop.atlasrr.com) **Minimum Table Size Required:** 2' x 5'

**Products Required:** Straight & radius sections, turnouts, a crossing, terminal joiners, bumper and a selector

Take an ordinary oval track, twist one end and you have one of the most popular track plan elements: the Figure 8. The Plattsburg Pretzel is a Figure 8, keeping operation interesting by making the train appear to reverse its direction as it proceeds. This layout also adds interest by adding a spur for more train enjoyment.

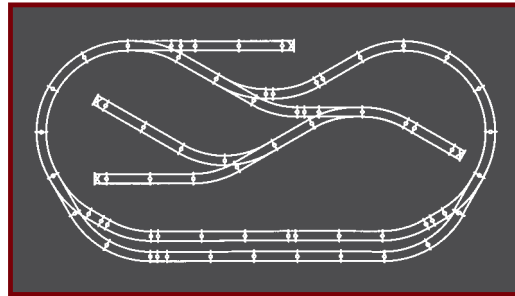

## **HO CODE 83/100: HO-7 THE JUNIOR PRETZEL**

**From Book #9:** *Beginner's Guide to HO Model Railroading*

**Minimum Table Size Required:** 6' x 8'

**Products Required:** Straight sections, radius sections, Snap-Switches, reraliers, terminal sections, a crossing, bumpers, rail joiners and the necessary electrical components

Since it is built on an extended platform, there are many possibilities with the HO-7; such as longer runs, longer trains and more realistic operations.

## **TT-3 MARTIN'S CREEK & SOUTHERN**

**From Book #15:** *Blueprints for 10 True-Track® Layouts*

**Minimum Table Size Required:** 4' x 8'

**Products Required:** Straight sections, radius sections, Snap-Switches, bumpers, insulated joiners and terminal joiners, a Selector, necessary electrical components

The Martin's Creek & Southern adds a passing siding and a dogleg to the basic oval, increasing interest and slightly lengthening the main line run. The spurs on the inside of the oval, along with the one in the dogleg, add switching locations.

<b>TOTAL PIECES ORDERED</b>					

Between 1964 and 1966, EMD built a total of 360 six-axle 2,500hp SD35 locomotives. From the mid-1960s through the 1980s, the SD-35 could be found in road service on both large and mid-sized roads across the US. Today the number of active units has dwindled to a select few, including those operated by regional railroad Montana Rail Link. Atlas' model incorporates many of the subtle details that differentiated the various SD-35 production phases. This includes the detail of the engine air intake, dust bin, radiator screens, radiator fans, fuel tanks and battery boxes.

### Features:

- Realistic die-cast underframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Golden-white LEDs
- Directional lighting
- Factory-equipped with AccuMate® knuckle couplers (AccuMate® couplers are made under license from AccuRail, Inc.)
- Detailed cab interior with crew
- Separately-installed scale windshield wipers, metal grab irons and fine scale handrails
- Marker lights with separate lenses
- Scale fans and grille detail
- Flat dust bin or raised dust bin as appropriate by railroad
- Snowplow (included but not installed)
- Atlas Master™ Series Silver Additional Features:
- NMRA 21-pin plug for DCC (Decoder-ready)

**Silver  
Sound Ready™**

### DCC Operation Features:

- Supports all DCC-programming modes • Flexible mapping of function keys F0 to F28. • A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

### Analog (DC) Operation Features:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts. Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

### ESU Sound Functionality Features:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more. There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

<b>TOTAL PIECES ORDERED</b>					

The first RS-11s were produced by Alco in early 1956. This locomotive, classified by Alco as model DL-701, was their replacement for the very popular RS-3 road-switcher. Featuring a V-12, 1,800hp 251B diesel engine, the RS-11 was Alco's answer to EMD's very successful GP9. The turbocharged RS-11 accelerated faster, had a higher tractive effort rating and typically used less fuel than the competition. It was also quite versatile and could be found in heavy haul freight as well as passenger service.

The largest owner of RS-11s was Norfolk & Western which purchased a total of 99 units (an additional 35 were added to the fleet after the merger with Nickel Plate). Other major purchasers included Northern Pacific, Pennsylvania and Southern Pacific, all of whom placed repeat orders. With approximately 426 units built for the US and Mexico over 8 years of production, the RS-11 was successful for Alco in that it provided ongoing competition for EMD's popular road-switchers. A few examples of this model are still in service today and can be found working for various shortlines in the US.

### Features:

- Golden-white LEDs
- Realistic die-cast mainframe
- Five-pole skewed armature motor with dual flywheels for optimum performance at all speeds
- Directional lighting
- Factory-equipped with AccuMate<sup>®</sup> knuckle couplers
- Separately-applied wire grab irons
- MU hoses and coupler cut bars
- Two painted crew members

### Atlas Master<sup>™</sup> Series Silver Additional Features:

- NMRA 21-pin plug for DCC (Decoder-ready)

### DCC Operation Features:

- Supports all DCC-programming modes • Flexible mapping of function keys F0 to F28. • A total of six DCC function outputs are available
- Follows all NMRA DCC standards and recommended practices.

### Analog (DC) Operation Features:

- The LokSound Select Dual-Mode decoder allows your Atlas Gold Series locomotive to be used on DC as well as on DCC layouts. Please note that the Atlas Quantum Engineer will NOT operate an Atlas Gold Series locomotive equipped with a LokSound Select decoder on an analog (DC) layout. However, the sound and lighting functions of the LokSound Select decoder in the locomotive can be controlled by an easy-to-use basic DCC system
- Also note that on a DC-powered layout, a DCC and sound equipped locomotive CANNOT be consisted with another locomotive that does not also have both DCC and sound. (This statement does NOT apply to DCC-equipped locomotives operating on a DCC layout.)

### ESU Sound Functionality Features:

- Over 20 sound effects are available, including engine start-up and shutdown, prime mover sounds through all eight notches, bell, air horn, air compressor, dynamic brakes and more. There are 16 user-selectable horns, 2 user-selectable bells, and 2 user-selectable synchronized brake squeals.
- Manual and Automatic Notching modes with the ability to change modes "on the fly" are provided for true realism.

		<b>TOTAL PIECES ORDERED</b>			

The increased volume of coiled steel transportation gave rise to a new purpose-built freight car. Previously rolls of coiled-steel had generally traveled in specially equipped gondola cars. In the 1960's a lighter type of car emerged specifically for hauling coils of steel in an integral trough. The car type gained popularity and eventually over 17,000 cars were built. Atlas' model replicates a 42' design with a distinctive fishbelly side sill.

**Features:**

- Crisp painting and lettering
- See-through walks
- Removable hood
- Inside floor detail
- Cut-levers

The Thrall Car 2743 cubic foot gondola was introduced in 1995. This new 52' 6" interior length design was in response to the newly allowed increase in Gross Rail Loading (GRL) to 286,000 lbs (up from 263,000 lbs). This allowed an increase of the inside height from the previously standard 5'0" to a new standard of 5'6", giving it a 2,743 cubic foot capacity. Thrall produced over 6,700 of these from 1995 to 1999. The design resumed production under TrinityRail® in 2005.

**Features:**

- Prototypical scale height reflecting the new higher capacities standard.
- Fourteen side posts
- Detailed brake components
- Etched platform
- Etched end reinforcement plate
- Detailed ladders and stirrups
- Metal hand grabs
- Metal brake rods
- Air hoses
- Corner pins and correct open notch
- Detailed side post support angle plates
- Opt. coupler pocket for Kadee #78 or Accumate Scale Coupler
- Accurate painting and lettering
- Ready-to-run

AccuMate® couplers are made under license from AccuRail, Inc.

<b>TOTAL PIECES ORDERED</b>					

The development of shipping containers reached a turning point in the late 1970s when standardization began to take place. Prior to this time numerous designs and sizes of containers were seen throughout the world. The true intermodal era began in the 1980s with the expanding world economy, Panama Canal ship size restrictions, intermodal railway car (wagon) designs and the setting of ISO standards for international shipping containers.

Today's commonly seen steel all-corrugated ISO containers still have some variations, primarily the doors. This Atlas model represents a standard-height 40-footer which will exhibit a range of door styles, roofs, and front walls to more closely match the variations in the prototype containers seen throughout the world.

**Features:**

- Production rail guides
- Roof corner pads
- LTR style handles
- Separately applied door rods and handles
- Optional separate vents
- Prototypically accurate "beveled" all corrugated sides
- Each set comes as a 3-pack

**Each set comes as a 3-pack!**

<b>TOTAL PIECES ORDERED</b>					

In the aftermath of World War One United States railroads learned there were financial advantages to standardization of the freight car fleet. The newly formed Association of American Railroads was tasked with developing standard freight car designs for North American railroads. Out of this work came the AAR Standard 50 ton 2-Bay Offset Hopper.

Atlas' version of this 2-Bay Offset, open top hopper with flat ends is modeled after this AAR Standard design built from the mid 1930's through the 1960's to transport coal.

**Features:**

- Ready-to-run
- Blackened metal wheels
- Free-rolling 50-ton trucks
- Detailed brake gear
- Body mounted AccuMate® knuckle couplers
- Prototypical painting and lettering

AccuMate® couplers are made under license from AccuRail, Inc.

# Need a Part for Your Atlas

It's never been easier with the new Atlas **PRODUCT/ORDER PARTS** link up pages. Go to the Atlas website [shop.atlasrr.com](http://shop.atlasrr.com) and click on the scale (N, HO, O) and product (locomotive or rolling stock) you're looking for...

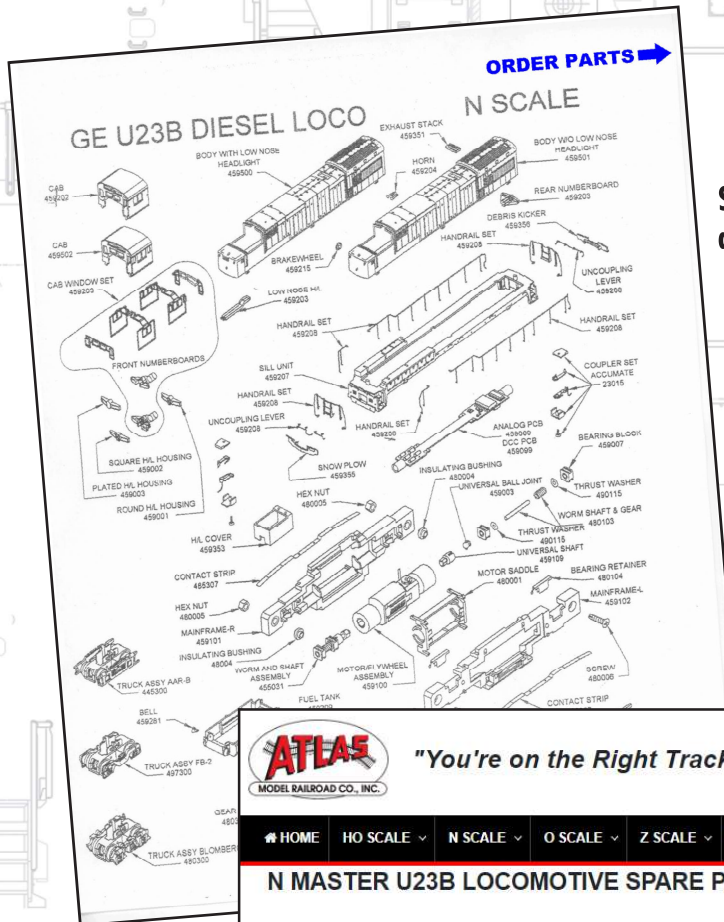

The screenshot shows the Atlas website home page. At the top left is the Atlas logo with the tagline "You're on the Right Track...with Atlas." and the text "MODEL RAILROAD CO., INC.". To the right is a search bar. Below the logo is a navigation menu with links for HOME, HO SCALE, N SCALE, O SCALE, Z SCALE, CATALOGS, PRODUCTION, DEALERS, BLOG, and INFORMATION. A large blue "N SCALE" graphic is prominent. A dropdown menu is open under "N SCALE", listing categories: PRODUCTS, TRACK, LOCOMOTIVES, ROLLING STOCK, PARTS, BLMA PARTS, LOCOMOTIVE PARTS, MISCELLANEOUS PARTS, and ROLLING STOCK PARTS. To the right of this menu is a grid of "ACCESSORIES" including BOOKS, BLMA ACCESSORIES, BRIDGES, ELECTRICAL, GIFT CERTIFICATES, SIGNAL SYSTEM, STRUCTURES, VEHICLES, and MISCELLANEOUS. Below the menu is a "New Arrivals" section featuring a "SHOP NOW" button and a banner for "N, HO, O & Z Scale Track, Layouts & Accessories".

Once selected you arrive at the library of locomotives or rolling stock and click on the product of interest...

The screenshot shows the Atlas website product page for "N MASTER LOCOMOTIVE SPARE PARTS". The page features a grid of eight product images, each with a caption below it. The products are: N MASTER GP-7/9 LOCOMOTIVE, N MASTER 2-6-0 MOGUL STEAM, N MASTER 4-4-0 LOCOMOTIVE S., N MASTER SHAY LOCOMOTIVE P., N MASTER MP-15DC LOCOMOTI..., N MASTER U238 LOCOMOTIVE S., N MASTER GP38-2 LOCOMOTIVE..., and N MASTER C420 LOCOMOTIVE S. The page also includes the Atlas logo, tagline, and navigation menu at the top.

# Locomotive or Rolling Stock?

Selecting the product of interest takes you to an exploded diagram and the **ORDER PARTS** page...

# Put Your Trains on the Right Track!

## With time tested, modeler approved Atlas HO & N scale track!

Whether you're finishing an existing layout, starting a new one, or just giving that trainset loop some extra pieces, Atlas has the 'right track' for you. The rugged plastic construction, nickel silver rail and U.S. prototype detail, assures longevity, maximum conductivity and accurate realism that guarantees your trains look good and keep running smoothly. Atlas track provides industry leading **quality** at unequaled **value**, and our **selection** is so large we have an entire catalog devoted to it. HO and N scale track, in a variety of rail sizes, is fully stocked and ready to ship to you and your favorite Atlas authorized dealer now. For more information, and the dealer nearest you, visit [shop.atlasrr.com](http://shop.atlasrr.com) and request a catalog of your own. And remember...*You're on the right track...with Atlas!*

### HO SCALE TRACK

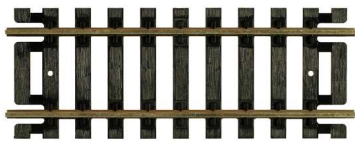

HO True-Track®

Atlas HO True-Track® has true-to-life gray gravel bed, correctly angled roadbed shoulders and features Atlas Code 83 Snap-Track®.

HO Code 83

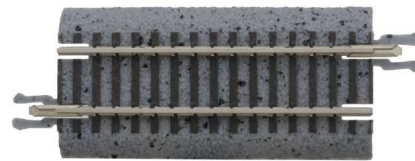

Atlas HO Code 83 track features prototypically-fine brown ties and nickel silver rail, and not only looks realistic but is incredibly reliable.

HO Code 100

Atlas HO Code 100 track features black injection molded plastic ties and solid nickel silver rail, and is suitable for all skill levels.

### N SCALE TRACK

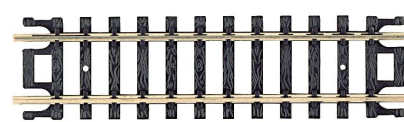

N True-Track®

Atlas N True-Track® features Code 65 rail & dark brown ties with prototypical spacing and is now improved with true-to-life gray gravel bed making it even more realistic!

N Code 55

Atlas N Code 55 track features simulated wood brown ties and smaller nickel silver rail, and is praised for its superior design and ease of use.

N Code 80

Atlas N Code 80 track features black ties and nickel silver rail, and is built to last for ultimate performance.

### ATLAS SUPER-FLEX® TRACK

- Item #168 HO Code 100 Super Flex Track
- Item #500 HO Code 83 Super Flex Track
- Item #2000 N Code 55 Super Flex Track
- Item #2500 N Code 80 Super Flex Track

Invented and patented by Atlas founder Stephen J. Schaffan Jr., this innovative, finely engineered precision track is the first choice of experts who demand the best. Easy to install, Super-Flex Track® enhances the realism of your layout. Unlike other flexible track which can become inflexible and kink, Atlas' Super-Flex Track® can be formed and re-formed with ease to achieve the desired shape. This unique track can be shaped to form curves of any radius, is ideal for spiral easement curves and is easily manipulated to help you make your layout vision a reality.

**ATLAS  
SUPER-FLEX® TRACK**  
the original and still the best.

**ACCEPT NO IMITATORS.**

# Atlas Keeps the Trains Rollin'

*You built your layout with Atlas track - the best track around, now you'll want to run the best trains! Our locomotives and rolling stock don't just look fantastic, they run like a dream and the details & features are second to none. With several different lines to choose from, we have you covered no matter the era!*

## Master and Classic Line Locomotives & Rolling Stock

*Atlas Master and Classic Line trains are top-of-the-line and feature the highest level of detail we offer. Each model comes ready-to-run, which means no assembly is required. Sometimes we include small plastic or etched metal detail parts for you to apply, to add a finishing touch. Locomotives from these lines are noted for their reliability and smooth operation.*

MASTER LINE  LOCOMOTIVES

MASTER LINE  ROLLING STOCK

*Classic*

## Trainman Line Locomotives & Rolling Stock

*Atlas Trainman Line products use the same drive train and feature the same prototypical accuracy as our other lines, but the shells have less separate detail added, and are generally offered in fewer variations or phases for each model as compared to our Master line.*

**TRAINMAN**

## Licensed, Limited Edition & Special Run Models

*While Atlas takes great pride in prototypical accuracy, we also enjoy creating fun, commemorative paint schemes to help modelers celebrate the holidays. We also partner with multiple brands to offer licensed models such as our 40' Plug Door Box Cars decorated with beer branded paint schemes! Still don't see what you've been dreaming of? Why not order it as a special run? Atlas offers the ability for customers to do custom runs on any model we currently make, provided you meet the minimum order quantities.*
