## Coe Rail Inc.

RND-2736 CRLE #119718 Era: 2001+  
RND-2737 CRLE #119770  
RND-2738 CRLE #119783

### PROTOTYPE AND BACKGROUND INFO:

Railroad boxcars are perhaps not only the best-recognized pieces of equipment ever put into service but also one of the most identifiable symbols of the industry itself. During the early years of the industry, freight was hauled on simple flatcars or early gondolas. In Upstate New York was the burgeoning Mohawk & Hudson Railroad, the first chartered system in the United States which later became part of the New York Central, came up with the novel idea of covering its gondolas in 1833 since the railroad dealt with snow throughout much of the winter.

The Roundhouse 50' High Cube, Plug Door box car is based on a common type of box car that began appearing in large numbers in the late 1970s. Such cars required greater overhead clearance to operate safely, but boasted greater cubic capacity than comparable standard-height cars. These cars commonly haul canned goods, finished rolls of paper, appliances, furniture, and lumber.

### MODEL FEATURES:

- Separate brake wheel
- Body-mounted McHenry® operating scale knuckle couplers
- Machined wheels with RP25 contours
- Weighted for optimum performance
- Fully-assembled and ready to run
- Highly-detailed, injection-molded body
- Painted and printed for realistic decoration
- Minimum radius: 18"

**\$29.99 INDIVIDUAL**
