PROTOTYPE AND BACKGROUND INFO:

Gondolas are low-sided railroad cars that are used for hauling bulky loads that don't need protection from the weather. The Roundhouse 40' gondola is representative of steel-bodied cars that began appearing on the rails in the early 1920s, and a few survive today working for modern roads and contractors.

MODEL FEATURES:

- Separately applied brake wheel
- Body-mounted McHenry® operating scale knuckle couplers
- 33" solid nickel silver wheels
- Machined wheels with RP25 contours
- Weighted for optimum performance
- Fully-assembled and ready to run
- Highly-detailed, injection-molded body
- Painted and printed for realistic decoration
- Minimum radius: 18"

\$34.99 INDIVIDUAL
