SKY BOX FOR AEROSPACE LOADS

ADVANCE RESERVATION

Eight colorful paint schemes in both HO and N Scale are being offered for the first time by InterMountain. The HO version will feature individual formed wire grab irons. Both the HO and N Scale versions will feature laser sharp decoration and will be equipped with operating knuckle couplers and precision InterMountain metal wheel sets. Advance Reservations are open until December 31. Please place your Advance Reservations as soon as possible so we can plan production at the earliest possible time.

The purpose of these cars was to accommodate the transportation of aircraft parts, in the 1960s the railroads developed new cars featuring lids mounted atop the flat car that protected the aircraft subassemblies during transport. Many of these cars were in assigned service routes to facilitate the aircraft builder's assembly process for various aircraft. These cars became known as the "Sky Box" and are still in service today.

GUNDERSON MAXI IV 3-UNIT WELL CAR & 53' CONTAINERS

NOW SHIPPING!

Eight colorful paint schemes of the Maxi IV late well car are ready to ship with or without containers. Four different containers are available with the Maxi IV's of individually. All feature laser sharp decoration and the well cars are equipped with operating knuckle couplers and precision InterMountain metal wheel sets. Quantities are very limited so be sure to confirm your Advance Reservations as soon as possible.

The Gunderson MAXI-IV container well car is a three-unit articulated freight car designed to carry multiple intermodal container sizes, maximizing versatility and flexibility for railroads and shippers alike. The depressed center well allows for containers to be stacked two high, resulting in a dramatic increase in containers carried per train versus conventional flat cars. The three-unit car carries one roadnumber with suffixes used to distinguish the separate wells and is joined together by drawbars on the interior well with couplers on the two end cars.
