

**- N Scale C44-9W -
BNSF + KCS + BNSF Warbonnet**

Old Models Used For Reference – Concept Art Shown – Not Final Artwork

New From Kato- The headliner of GE's 1993 freight locomotive line was the 6 motor, 4400hp C44-9W Dash 9. Slightly longer than its predecessors at 73 feet, 2 inches, the C44-9W used a new HiAd, bolsterless low-weight truck that was designed for better grip on the rails no matter the weather. A split cooling system lowered engine temperatures and fuel consumption as well, granting these locomotives a longer operation life and lower overhead costs

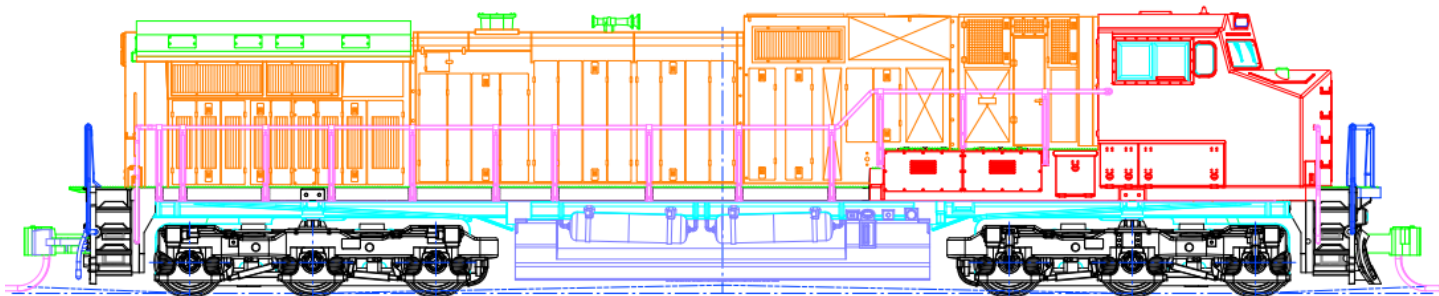

Model Features:

- Powerful five-pole KATO motor with dual brass flywheels
- Directional Headlight and illuminated preprinted numberboards
- Prototypical ditchlight location
- Kato magnetic Knuckle coupler
- DCC Friendly Mechanism ready for Drop In Decoder Installation

- All New Items -

- PRE-ORDER DEADLINE: 01-06-25 for all items by 4pm CST -

We are enhancing this model's tooling to incorporate more detailed features from previous iterations. The updated version now includes additional underframe details to align with our other highly detailed locomotives.

ITEM #	MAP	DESCRIPTION	Expected Delivery	Carton Qty.	MSRP
176-3515	Y	(N) C44-9W BNSF Warbonnet #615	June 2025	12	\$155.00
176-3515-DCC	Y	(N) C44-9W BNSF Warbonnet #615 /Pre-Installed DCC	July 2025	12	\$255.00
