All-New Versions of the popular Krauss-Maffei ML4000 Diesel Loco

## SP Modified Units! 9100, 9101, 9102

- 97810 9100 Non-sound
- 97811 9100 DCC/Sound
- 97812 9101 Non-sound
- 97813 9101 DCC/Sound
- 97814 9102 Non-sound
- 97815 9102 DCC/Sound

Non-sound versions are DCC-ready for a PluX22 decoder. DCC/Sound versions come with PIKO SmartDecoder XP 5.1 Sound. Only the PIKO XP-series SmartDecoder brings you tons of authentic K-M sounds and lighting functions!

The original SP KM ML4000 locos started life as almost identical triplets. But modifications over the years made them quite different. Now numbered 9100, 9101, and 9102, these faithful replicas show each loco in its mid-60s weathered and battle-scarred appearance, with numerous detail differences, such as:

- Side air intake louvers & upper intake shutters
- Filter boxes and rooftop vents
- Roof-mounted EMD air reservoirs with additional piping
- EMD-style pilot snowplows
- Exposed exhausts with butterfly valve flaps
- Each loco features accurate – and different – SP ‘wing’ patterns on the noses
- Different paint patches and revised road number stenciling
- ‘Pre-weathered’ paint colors authentically reflect years of sun-fading and partial repainting

Look closely to spot the differences on each road number between ‘wing’ patterns, subtle color variations, handgrab colors, etc.

The same PIKO quality and attention to detail that WOWed every reviewer of the SP As-Delivered and D&RGW versions is in these SP Modified versions.

There are limited quantities of the D&RGW As-Delivered units still available. Check with your favorite retailer!
