## GP16 DIESEL

**ADVANCE RESERVATION**

Ten paint schemes of the second run of GP16 diesels in HO scale. Nine of the current paint schemes are being done for the first time. These models feature finely molded parts and have been designed to reproduce railroad specific detail. All locomotives are factory equipped with an ESU LokSound sound decoder or an ESU LokPilot non-sound DCC decoder. An optional DC only plug is available upon request.

## CYLINDRICAL COVERED HOPPER

**ADVANCE RESERVATION**

Eight paint schemes of the trough and round hatch cylindrical hopper car are now available for reservation. Six of the schemes are being done for the first time by InterMountain Railway Company. These colorful cars were built in the 1980's and are still in interchange service throughout North America. Each model is available in six different road numbers.

Scale

## TRINITY 5161 COVERED HOPPER

**NOW SHIPPING**

Ten road names of the HO 5161 hopper car will be shipping in early June. All models feature laser sharp decoration, Kadee® operating knuckle couplers, precision InterMountain® metal wheel sets, and multiple road numbers. Be sure to confirm your Advance Reservations early as some items are in short supply.

In the early 1990s America's covered hopper fleet began to show it's age. Many hoppers were already approaching 30 years of service and were limited in capacity. The times were changing; shippers and the railroads demanded higher capacity covered hoppers for a new era of railroading. Unit trains of covered hoppers were becoming the norm. Trinity responded with a new design boasting 5,161 Cubic Feet of capacity. Their design served a number of key markets, including grains, fertilizers, petrochemicals, incorporating different loading hatches and outlet gates. Many North American railroads adopted the Trinity 5161 covered hopper design into their unit trains. These cars are still rolling in service today and InterMountain® is proud deliver this ubiquitous railcar in two major body variants not offered in plastic until now.
