38271 PRR Mogul 213 w/Smoke & **Tri-Mode Sound**

Operates on DC, Digital, or Battery R/C

38270 D&RGW Mogul 288 w/Smoke & **Tri-Mode Sound**

Tri-Mode Sound — Another FIRST from PIKO!

Steam Locos with smoke and digital sound, factory-equipped for operation on:

- DC Track Power
- DCC Digital
- Onboard Battery Power with R/C

For easy Battery R/C operation, insert (10) AA rechargeable cells (not included) into the battery clip in the tender. Or connect your own lithium battery packs, available from various G-Scale retailers, to the industry-standard socket, for many hours of run-time. Control speed, direction, emergency stop, bell and playable whistle with the included PIKO R/C Pocket Remote. Up to eight locos can run independently on different R/C channels.

Both DC and Battery operation offer a wealth of automatic digital steam sound features, like exhaust chuff, air pump, and more. KeepAlive® technology keeps everything running smoothly even over dirty track on DC/DCC power, and provides standstill sound in all three modes.

DCC operation offers even more features, plus all the benefits of TCS WOWSteam Sound. Choose from numerous bells, exhaust chuff sounds and more! Audio Assist® guides you through programming without the need to memorize CVs.
