TRINITY® 19.6K GALLON TANK CAR

ADVANCE RESERVATION

An additional six NEW paint schemes on the Trinity® 19.6K gallon tank car are now available for Advance Reservation. Don't forget the six paint schemes that are already on Advance Reservation! These twelve paint schemes feature eleven that have never been done by InterMountain before. Each of these models is decorated with laser-sharp painting and lettering, and is equipped with separately applied grab irons, etched metal walkway, Kadee® metal operating couplers, precision InterMountain metal wheel sets, and formed wire hand rails. Please forward your Advance Reservations as quickly as possible so that we can go forward with production. This tank car was first produced in the late 1980's by Trinity® to carry sweeteners. The car is still available for production and the uses have been expanded to other liquid and powder food-related products.

4750 COVERED HOPPER

NOW SHIPPING

Ten paint schemes of the N scale 4750 are now ready for shipping! Seven of the paint schemes have never been done by InterMountain before! These models feature laser-sharp decoration, and are equipped with etched metal walkways, operating knuckle couplers, and precision InterMountain metal wheel sets. Several of the items are in short supply, so get your confirmations and reorders in as quickly as possible.

WHEEL SET PRICING

We are increasing wheel set pricing to cover the cost of the now existing tariff and increased manufacturing costs. Please refer to the enclosed Wheel Set Pricing sheet for more information.

SUMMER TRAIN SHOWS!

InterMountain Railway Co. has been on the road visiting with our customers this summer. We really enjoyed our time at the N-scale Convention in Overland Park, Kansas and in Deshler, Nebraska for the Spring Creek Model Train Show. We thank everyone that has come up and visited with us and shared their thoughts and experiences with InterMountain products!

Our next show is scheduled for the National Train Show in Novi, Michigan July 19-20. We look forward to seeing our customers there. If you plan on attending the show please stop by!

PHOTO: TRINITYRAIL.COM

Trinity introduced the 19.6K Gallon tank car in the late 1980s, it is still included in TrinityRail's product catalog to this day. Initially built primarily to carry sweeteners, as these cars go through their service lives, some are being rebuilt for other services as well. The Trinity 19.6 is a coiled insulated tank car with a very distinctive "cut-away" behind the side access ladders. Various dome access walkway handrail options have been spotted from "early" to "late" deliveries. InterMountain is observing these handrail variants per prototype. InterMountain is also offering a "Semi-gloss" version depicting the sheen exhibited on the Trinity Leasing (TILX) builder photo for this production run of 47816. These cars can often be found in ADM service among others.
