

**- HO Scale Viewliner II, HO Scale F40PH Metra, HO Scale Superliners –
 -N Scale PC Unitrack-**

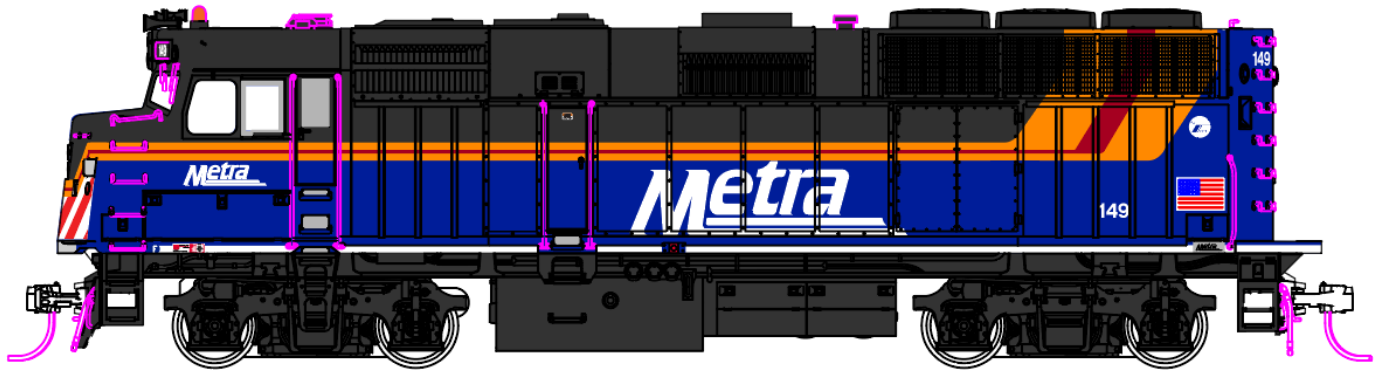

New From Kato: *HO Scale Viewliner IIs.* The Amtrak Viewliner II is the latest generation of single-level passenger cars designed for long-distance travel on the Eastern U.S. routes. Built by CAF USA, these modern railcars feature enhanced amenities, improved energy efficiency, and a sleek stainless-steel exterior that pays homage to classic streamliners. The Viewliner II fleet includes sleepers, diners, baggage cars, and crew dorms, offering passengers a more comfortable and contemporary travel experience. Notable upgrades include improved climate control, LED lighting, accessible restrooms, and updated sleeping accommodations with private bathrooms in the sleeper cars.

Features

- Designed to operate along with Kato's HO Superliners.
- Metal weights give prototypical heft and momentum.
- Optional kinematic couplers allow prototypical close coupling while still navigating tight radius curves.
- Able to be illuminated with Kato's optional 7-504 interior lighting kit.
- Designed with easily illuminated marker lights with optional light board.
- Free rolling, detailed trucks with rotating bearing caps and shock absorber construction.

- PRE-ORDER DEADLINE: 09-30-25 for Viewliner IIs by 4pm CST –

New From Kato: *HO Scale F40PH.* The Metra F40PH is a workhorse diesel-electric locomotive that has been a staple of Chicago's commuter rail system since the 1970s. Originally built by EMD and later rebuilt by various contractors, the F40PH is known for its distinctive "bulldog" nose, reliability, and iconic rooftop air horn. These locomotives power many of Metra's daily trains, providing dependable service across the region. With their distinctive blue and gray paint schemes and bold Metra logos, the F40PHs have become a familiar sight to generations of Chicagoland commuters

Features

- Perfectly suited to pull Kato's Superliners or Bi-Level commuter cars
- Directional headlights
- DCC and Sound friendly with 8 pin plug and 1.1" (28mm) speaker opening
- Illuminated pre-printed numberboards
- Powerful five pole motor with dual brass flywheels
- Detail specific to each railroad, including ditch lights, cab air conditioners, fan height, headlight arrangement, pilot, rear platform, and cab roof arrangement
- Available Kato-Direct with DCC and Sound installed
- All wheel electrical pickup from scale 42" blackened metal wheels

- PRE-ORDER DEADLINE: 08-29-25 for F40s by 4pm CST -

New From Kato: *HO Scale Amtrak Superliner.* The Amtrak Superliner I is a bi-level passenger railcar introduced in the late 1970s to enhance long-distance travel across Amtrak's western routes. Built by Pullman-Standard, these iconic cars feature two levels of seating and accommodations, offering panoramic views from large upper-level windows. Designed for comfort and capacity, the Superliner I fleet includes coaches, sleepers, diners, and lounges. With their spacious interiors, onboard amenities, and smooth ride, Superliners quickly became a symbol of modern American rail travel and remain a backbone of Amtrak's long-distance service today.

Features

- Perfectly suited to be pulled by Kato's EMD F40PH locomotives or GE P42 "Genesis" locomotives.
- All details factory installed
- Metal weights give prototypical heft and momentum
- Optional included Kinematic couplers allow prototypical close coupling while still navigating tight radii
- Superliners have full interior detailing and can be lit with optional 7-504 interior lighting kit (non-lounge only – use special #958048 to light the Lounge)
- Passenger cars have tinted, flush windows
- Designed to easily illuminate marker lights with optional light board #958046
- Free rolling, detailed trucks with rotating bearing caps (Superliners and MHC's only) and shock absorber construction
- Crisp, elegant detailing
- Two Road numbers of each car, Coach, Coach-Baggage, Diner, Lounge, Sleeper

- PRE-ORDER DEADLINE: 08-29-25 for Superliners by 4pm CST -

- New Product Announcement -
